Definitions [용어정의]

Terms/용어	Definition/정의
Curriculum Year [교육과정 적용연도]	<p>In principle, students should refer to their entrance year curriculum. However, the new curriculum can also be counted accordingly. Students who have changed their following curriculum from track-based to department-based should follow 2021 curriculum in principle. 원칙적으로, 본인의 입학년도 교육과정을 따라야 하나, 이후 교육과정 또한 참고하여 이수할 수 있으며 해당 교육과정상 이수구분에 따라 인정받을 수 있습니다. 트랙제 → 학과제 변경학생은 2021학년도 교육과정 이수를 원칙으로 합니다.</p>
Basic [기초]	<p>Formerly 'Fundamental' courses. Each field has [Required] basic courses and [Elective] courses. Basic [Elective] requirements are designated by each department(school). 구) 계열기초 교과. 각 계열별 [기초필수] 교과와 [기초선택] 교과가 있습니다. [기초선택] 교과는 각 학과(부)별 요건이 별도로 지정되어 있습니다.</p>
Liberal Arts [교양]	<p>In Liberal Arts, there are ① English ② Language ③ Liberal Arts courses, and each section has separate requirements. 교양 영역에는 ① 영어 ② 언어(제2외국어) ③ Liberal Arts(교양) 세가지 분야가 있고, 각 분야별 별도의 학점이 설정되어 있습니다.</p>
Major [전공] Double Major [복수전공] Minor [부전공]	<p>All students must have one major from sophomore. However, students can have double major and minor and they are optional. 모든 학생은 2학년부턴 주전공을 필수적으로 선택하게 되어 있고, 복수전공과 부전공은 선택사항입니다.</p>
Prerequisite [선이수] Identical [동일교과]	<p>[Prerequisite] If course A has prerequisite course B, course B should be completed before taking course A. [Identical] If course C and course D is identical, taking course C will be regarded as taking course D [선이수교과] A 교과의 선이수 교과가 B인 경우, A 교과를 이수하기 위해서는 B 교과를 이수 완료하여야 합니다. [동일교과] C 교과와 D 교과가 동일교과인 경우, C 교과를 이수하면 D 교과를 이수한 것으로 간주됩니다.</p>
Minimum credits [최소학점]	<p>All credit requirements in each category is minimum credits. Each department(school) has own graduation requirements so you should carefully confirm your major graduation requirements. 각 영역별로 학교에서 정한 최소 학점이 설정되어 있고, 각 학과(부)에서 영역별로 졸업요건을 별도로 설정했습니다. 반드시 각 학과(부)별 졸업요건을 확인해주세요.</p>
Free Elective [자유선택]	<p>All courses that are not counted in [Basic], [Liberal Arts], [Major/Double Major/Minor] will be counted in [Free elective] courses. [기초], [교양], [전공/복수전공/부전공]으로 인정되지 않은 학점은 [자유선택]으로 인정됩니다.</p>
Semester [개설학기]	<p>Semester offered in each page is plan of each department(school). Course opening semester is subject to change according to various circumstances. 각 페이지에 있는 개설학기는 각 학과(부)의 개설 '계획'입니다. 개설학기는 여러 상황에 따라 변경될 수 있습니다.</p>

Instructions [교육과정 설명서]

1. Graduation Requirement [졸업 이수요건]

Category 구분	Credits 이수학점	Remarks 비고	Subtotal 소계
Basic 기초	Required 필수	Calculus I(3), General Physics I(3), General Chemistry I(3), General Biology(3), Introduction to AI Programming I(3), General Chemistry Lab I(1), General Physics Lab I(1) (Total 17 credits)	At least 30 Credits
	Elective 선택(학과 지정)	Complete basic elective courses at least 13 credits including Applied Linear Algebra(3) and Differential Equations(3)	
Major 전공	Required 필수	Refer to Required course list below	At least 48 Credits
	Elective 선택	Refer to Elective course list below	
	Internship 인턴십	3 Internship (Choose one among Research, Industrial, Venture Creation, Co-op)	3 Credits
Free Elective 자유선택	19	All courses acceptable	At least 19 Credits

* For Liberal Arts and Leadership requirements, refer to school Common requirements

2. Basic Requirements [기초 이수요건]

No.	Course Code	Course Title	Major 전공	Double Major 복수전공	Minor 부전공
			13 credits	6 credits	-
1	MTH112	Calculus II (3)	○		
2	PHY103	General Physics II (3)	○

●: Required ○: Elective ◐: Recommended, (): credits

01. Graduation Requirement [졸업 이수요건]

All students must check each department(school) graduation requirements. You must complete at least minimum credits for each category. Also see the overall graduation requirements on next page.

모든 학생은 졸업을 위하여 각 학과(부)별 졸업 이수요건을 확인하여야 합니다. 각 영역별 최소학점 이상을 이수하여야 합니다. 다음 페이지에 있는 계열별 졸업 요건도 반드시 함께 확인하시기 바랍니다.

02. Basic Requirement [기초 이수요건]

Each department(school) has basic course requirements for major/double major/minor. Major requirements will be counted as 'Basic elective'. If there are double major and minor requirements, completed credits will be counted as free elective.

각 학과(부)에는 전공/복수전공/부전공 기초 교과 이수 요건이 있습니다. 각 전공(Major) 이수요건은 기초선택 요건으로 인정되며, 복수전공/부전공에 필수 요건이 있는 학과(부)의 경우 해당 교과 이수시 해당 학점은 자유선택으로 인정됩니다.

3. Curriculum [기계공학과 교육과정]

▶ Credit Requirements [이수학점]

Department (School)	Major(전공)			Double Major(복수전공)			Minor(부전공)		
	R	E	Total	R	E	Total	R	E	Total
Department of Mechanical Engineering	27	21	48	18	18	36	9	9	18

*R: Required, E: Elective

▶ Required [전공필수]

Course Code	Course Title	Major	Double	Minor	Cred - Lect - Exp.	Remarks	Semester
UEE201	Introduction to Environmental Engineering 환경공학개론	○	○	○	3-3-0		1
UEE202	Earth and Environmental Sciences 지구환경과학	○	○	○	3-3-0		1
UEE203	Introduction to Civil Engineering 건설공학개론	○	○	○	3-3-0		1
UEE204	Introduction to Urban Planning 도시계획개론	○	○	○	3-3-0		1
UEE205	Introduction to Natural Hazards 자연재해개론	○	○	○	3-3-0		1
UEE490	Graduate Thesis 졸업논문	○	-	-	0 credit		1,2
Total		15	15	15			

* Double major students can choose 4 subjects out of 5 required courses above, and minor for 2 subjects.

03. Credit Requirements [전공/복수전공/부전공 이수학점]

Major, Double Major, Minor has [Required] and [Elective] courses. You must complete certain credits in Required and Elective courses.

전공/복수전공/부전공에는 [필수교과]와 [선택교과]가 있습니다. 각 필수교과, 선택교과 중에서 일정 학점 이상을 이수하여야 합니다.

04. Course List (교과목록)

[Required] and [Elective] courses are listed by each department(school). Also, read carefully of the captions written below the list. The ○ notation in the list means a course that is only counted by a particular major type. Ex) If there are no circles on [Minor] courses, those courses will not be counted as minor credits. It will be counted as free elective courses.

각 학과(부)별로 [필수교과], [선택교과]가 표기되어 있습니다. 과목 목록 하단에 주석이 있는 경우 자세히 읽어보시기 바랍니다. 목록에 있는 ○ 표기는 특정 전공 유형에게만 인정되는 교과를 의미합니다. 예를 들어, 부전공에 ○ 표기가 안되어 있으면 부전공 학점으로 인정받을 수 없고 자유선택으로만 인정 가능합니다.

4. Curriculum Change [교육과정 변경사항]

2021	2022
(NEW)	UEE337 Building Collapse and Safety Inspection Techniques 건물 붕괴와 안전진단 기술
UEE335 Structural Engineering Lab 구조공학실험	(Closed) Substitution[대체과목]: UEE337
UEE354 Disaster Risk Analysis 재난위험성 분석	(Closed) Substitution[대체과목]: UEE352
UEE451 Weather Analysis and Prediction 날씨분석 및 예보	(Closed) Substitution[대체과목]: UEE205

5. Curriculum Map [교육과정 이수 체계도]

	Freshman		Sophomore		Junior		Senior	
	Spring	Fall	Spring	Fall	Spring	Fall	Spring	Fall
Required Basic Courses			Classical Mechanics I	Classical Mechanics II	Quantum Physics I	Quantum Physics II	Thermal and Statistical Physics II	Fluid Physic
Elective Basic Courses	General Physics II	Electro-magnetism I	Electro-magnetism II	Computational Physics	Thermal and Statistical Physics I	Introduction to Plasma Physics	Nuclear and Elementary Particle Physics	
	General Physics Lab II	Modern Physics	Mathematical Physics	Physics Lab II	Solid State Physics I	Biological Physics	Introduction to Beam Physics	
	Calculus II	Applied Linear Algebra	Physics Lab I	Astrophysics :Stars and Blackholes	Astrophysics :Galaxies and the Universe	Solid Physics II :Quantum Materilas	Introduction to Theoretical Physics	

05. Curriculum Change [교육과정 변경사항]

Changes from 2025 curriculum to 2026 curriculum will be listed.

2025학년도 교육과정 대비 2026학년도 변경사항이 기재되어 있습니다.

06. Curriculum Map [교육과정 이수 체계도]

Recommended curriculum path is suggested by each department (school)

각 학과(부)별 권장 이수 체계도가 각 학과(부)별로 기재되어 있습니다.

Graduation Requirements

Engineering Field (이공계열)

* Below credits are minimum requirements for each category (각 영역별로 기재된 학점은 최소 충족 학점임)

Category		Course List		Credits		Total (Credits)
Basic 기초	Required 기초필수	Calculus I		3		14
		General Physics I		3		
		General Chemistry I		3		
		General Biology		3		
		General Physics Lab I		1		
		General Chemistry Lab I		1		
	Elective 기초선택	Follow each department(school) requirements		At least 10		At least 10
AI Required AI 기초필수	Introduction to AI Programming I		Choose 1 (3 credits)	6	At least 6	
	Mathematical Thinking for AI (가칭)					
	Introduction to AI Programming II		3			
Liberal Arts 교양	Korean 한국어	Korean Students	Korean Writing	2		At least 18
		International Students	Korean I Korean II	Choose 1 (2 credits)		
	English 영어	[For students admitted from the Class of 2026 onward] Completion of two Advanced courses (one per area) Prerequisite: Intermediate course completion * See page 20 for details.		4		
	Liberal Arts 교양	Take 12 credits in Liberal Arts Category		12		
Major 전공	AI Application AI 응용	AI Application [AI 응용]		6		At least 6
	Major 전공 *Refer to each department(school) requirements	Common Major Core [공통전공기초]		(12)*		At least 51
		Major [전공]		At least 48		
		Internship (Choose one among Research, Industrial, Venture Creation, Co-op)		3		
		Double Major [복수전공] (Optional)		At least 36		
Minor [부전공] (Optional)		At least 18		-		
Free Elective 자유선택	All courses acceptable		Follow Each department(school) requirements			
Leadership 리더십프로그램	UNIST Leadership Program		6AU			

Total 124 credits / 6AU

*전공학과별 졸업이수요건(AI 기초필수, AI 응용, 공통전공기초 과목 포함) 추후 공지 예정입니다.

*Graduation requirements by major, including AI required courses, AI application courses, and Common Major Core courses, will be announced later.

*공통전공기초는 전공 선택 전·후에 전공 구분 없이 각 전공의 기초 교과목을 이수할 수 있도록 구성된 교과군임. 학생은 공통전공기초를 총 12학점 필수 이수하며, 이수 과목은 추후 선택 전공에서 전공필수 또는 전공선택으로 인정될 수 있음. 전공으로 인정되지 않는 과목은 자유선택학점으로 인정됨.

*Common Major Core refers to a group of courses designed to allow students to complete foundational courses across different majors before or after selecting their major. Students are required to complete 12 credits of Common Major Core courses. Completed courses may be recognized as major required or major elective credits in the student's selected major. Courses that are not recognized toward the major will be counted as free elective credits.

*영역명 변경: Language(언어) → Korean(한국어) (2026학년도부터 적용)

*Area Name Change: Language → Korean (Effective from the 2026 Academic Year)

Business Administration Field (경영계열)

* Below credits are minimum requirements for each category (각 영역별로 기재된 학점은 최소 충족 학점임)

Category		Course List		Credits		Total (Credits)
Basic 기초	Required 기초필수	Calculus I		3		6
		General Physics I		Choose 1		
		General Chemistry I				
		General Biology				
	Elective 기초선택	Follow each department(school) requirements			At least 16	
AI Required AI 기초필수	Introduction to AI Programming I		Choose 1 (3 credits)	6	At least 6	
	Mathematical Thinking for AI (가칭)					
	Introduction to AI Programming II		3			
Liberal Arts 교양	Korean 한국어	Korean Students	Korean Writing	2		At least 18
		International Students	Korean I	Choose 1 (2 credits)		
			Korean II

-	School of Business Administration 경영과학부	21	27	48	21	15	36	12	6	18

* R: Required (필수) / E: Elective (선택)

* Double Major and Minor are optional. Students can apply for Double Major and Minor in their 3rd semester.
복수전공, 부전공은 선택사항이며 3학기에 신청 가능.

■ Graduation Requirements of each department(school) [학과(부)별 졸업과제]

College 단과대학	Department(School) 학과(부)	Requirements
College of Engineering 공과대학	Department of Mechanical Engineering 기계공학과	MEN490 Thesis Study [졸업연구] (3 credits)
	Department of Civil, Urban, Earth, and Environmental Engineering 지구환경도시건설공학과	CUEE490 Graduate Thesis [졸업논문] (0 credits)
	Department of Semiconductor Engineering 반도체공학과	SSE690 Master's Research [석사논문연구] (3 credits)
	Department of Materials Science and Engineering 신소재공학과	Complete at least 3 credits of Research Internship or Coop internship and submit internship report
	School of Energy and Chemical Engineering 에너지화학공학과	ECHE490 Undergraduate Thesis Research [학사졸업논문연구] (3 credits)
	Department of Nuclear Engineering 원자력공학과	NE490 Graduate Thesis [졸업논문] (0 credits)
College of Information & Biotechnology 정보바이오 융합대학	Department of Design 디자인학과	Complete course: DES402 Product Service System Design [제품 서비스 시스템 디자인] (3 credits)
	Department of Biomedical Engineering 바이오메디컬공학과	Complete course: BME490 Capstone Design [캡스톤디자인] (3 credits)
	Department of Industrial Engineering 산업공학과	Complete course: IE450 Project Lab [프로젝트랩] (3 credits)
	Department of Biological Sciences 생명과학과	BIO490 Thesis Research [졸업논문] (3 credits)
	Department of Electrical Engineering 전기전자공학과	EEE490 Undergraduate Research [졸업연구] (3 credits)
	Department of Computer Science and Engineering 컴퓨터공학과	CSE401 Research in Computer Science and Engineering [졸업연구] (3 credits)
College of Natural Sciences 자연과학대학	Department of Physics 물리학과	PHY490 Graduate Thesis [졸업논문] (0 credits)
	Department of Mathematical Sciences 수리과학과	MTH490 Graduate Thesis [졸업논문] (0 credits)
	Department of Chemistry 화학과	CHM400 Thesis [졸업논문] (3 credits)
-	School of Business Administration 경영과학부	Complete course: MGT499 Strategic Management [경영전략] (3 credits)

School of Liberal Arts [인문학부]

■ School Introduction [학부소개]

With a view to realizing UNIST's vision of educating global leaders in science and technology who will contribute to the prosperity of humankind, the School of Liberal Arts (SLA) is committed to nurturing the creativity, critical thinking and communication skills of students. The SLA offers undergraduate courses in humanities, social sciences, visual arts, and musical instrument performances including piano and violin. The SLA faculty and staff members are dedicated to providing quality teaching and cultivating the various talents of individual students. In an effort to assure UNIST students of the best education, SLA will continue to diversify its curriculum and extend collaboration with other departments and institutions.

■ Liberal Arts Curriculum [교양 교육과정]

Category	Course Code	Course Title	Cred. -Lect. -Exp.	Remarks	Semester	
English	ENG110	English Listening&Speaking(Intermediate) 영어 듣기&말하기(중급)	2-1-2	Before the 2026 cohort : 2 required courses by level	1,2	
	ENG111	English Listening&Speaking(Advanced) 영어 듣기&말하기(상급)	2-1-2		1,2	
	ENG113	English Reading&Writing(Intermediate) 영어 읽기&쓰기(중급)	2-1-2		Level 3 (L&S) : ENG111 required (incl. 2026 cohort)	1,2
	ENG114	English Reading&Writing(Advanced) 영어 읽기&쓰기(상급)	2-1-2		Level 3 (R&W) : ENG114 required (incl. 2026 cohort)	1,2
	ENG115	English Listening&Speaking (Intermediate, 0 credit) 영어 듣기&말하기 (중급, 0학점)	0-1-2	2026 cohort and onward: 2 advanced courses required	1,2	
	ENG116	English Listening&Speaking (Advanced, Prereq: Intermediate) 영어 듣기&말하기 (상급, 선이수: 중급)	2-1-2	Levels 1-2 (L&S) : ENG115 required → prerequisite for ENG116	1,2	
	ENG117	English Reading&Writing (Intermediate, 0 credit) 영어 읽기&쓰기 (중급, 0학점)	0-1-2	Levels 1-2 (R&W) : ENG117 required → prerequisite for ENG118	1,2	
	ENG118	English Reading&Writing (Advanced, Prereq: Intermediate) 영어 읽기&쓰기 (상급, 선이수: 중급)	2-1-2	* ENG115-ENG118 : Not available to pre-2026 cohort or Level 3 students (incl. 2026 Lv3)	1,2	
Korean	LNG100	Korean Writing 한국어 글쓰기	2-1-2	Only for Korean Students *LNG100 will be offered in Korean	1,2	
	LNG203	Korean I 한국어 I	2-1-2	Only for International Students (Non-Korean Students)	1,2	
	LNG204	Korean II 한국어 II	2-1-2		1,2	

* Area Name Change: Language → Korean (Effective from the 2026 Academic Year)

* 영역명 변경: Language(언어) → Korean(한국어) (2026학년도부터 적용)

* Language & Korean Areas - Common [공통사항]

(Applicable to students admitted in or after the 2021 cohort)

Restrictions for Korean and international students apply to students admitted in or after the 2021 cohort.

[적용 대상: 2021학번부터 / 내국인 및 외국인에 대한 수강 제한은 2021학번부터 적용됨]

* Language

(Applicable to students admitted up to the 2025 cohort)

Students may fulfill the requirement through credit exchange by completing second foreign language courses.

[적용 대상: 2025학번까지 / 학점교류를 통해 제2외국어 교과목을 이수하여 요건을 충족할 수 있음]

■ Language Exemption Guideline [언어 영역 면제 기준]

Students who meet language exam criteria below will have their language requirements exempted.

아래의 어학 시험 기준을 충족하는 학생은 언어 영역 수업 이수가 면제됩니다.

2026학년부터 언어 영역이 한국어 영역으로 변경됨에 따라, 기존 언어 영역 면제 기준은 2026학년부터 적용되지 않습니다. Beginning with the 2026 cohort, the Language Area is replaced by the Korean Language Area, and the previous language exemption guideline does not apply to students admitted in or after the 2026 cohort.

Category	Type of Exam	Score (Criteria)
Chinese 중국어	HSK	Level 3 or higher
Spanish 스페인어	DELE	A2 or higher
Japanese 일본어	JLPT	N3 or higher
German 독일어	Goethe -Zertifikat	A2 or higher
French 프랑스어	DELFB	A2 or higher
Russian 러시아어	TORFL	Basic Level or higher
Korean (For International Students)	TOPIK	Level 2 or higher

■ English requirements by level [레벨별 이수 가이드]

All students are required to complete English courses according to their level.

Students entered from 2023 will have 'Listening & Speaking level' and 'Reading & Writing' level separately.

모든 학생은 레벨에 따라 영어 교과를 이수하여야 합니다.

2023년 입학생부터는 듣기&말하기 레벨과 읽기&쓰기 레벨이 각각 따로 부여됩니다.

▶ Students admitted in 2022 and earlier (2022학번 및 이전 학번)

9	Lev.4	Lev.3							0	1	L&S Exemption
10	Lev.4	Lev.4								0	All Exemption

* 2026 cohort and onward [2026학번부터 적용]

- ① Both advanced English courses in each respective area must be completed to satisfy the graduation requirement.
[영역별 영어 상급 과목을 2개 모두 이수해야 졸업요건 충족이 가능함]
- ② Students assigned to Level 1 or Level 2 must enroll in the 0-credit intermediate course. Failure to complete this 0-credit course will result in ineligibility to take credit courses.
[Level 1 및 Level 2 부여자는 중급 과목 중 0학점 과목을 수강해야 함. 0학점 과목 미이수 시 정규 학점 과목 이수가 불가함]
- ③ Students assigned to Level 3 are not allowed to register for advanced courses that have prerequisite requirements.
[Level 3 부여자는 선이수 요건이 지정된 상급 과목을 수강 신청할 수 없음]

* Common [공통사항]

- ① Level 4 students will have English courses exempted. (Applies to all students including students entered before 2021)
[Level 4 부여자는 영어 수업 이수 면제됨 - 2021학년도 이전 입학생들에게도 일괄 적용됨]
- ② Level 1 students must complete the English Camp prior to English course registration.
[Level 1 부여자는 영어 캠프 선이수 후 영어 과목 수강 신청이 가능함]
- ③ English native speakers may be exempted from English course requirements by submitting documents that verify at least three years of attendance or graduation from a high school in an English-speaking country (e.g., the U.S., U.K., Canada, Australia, New Zealand, or Ireland) and obtaining approval from the English course instructor.
Note: Only countries where English is the first language are recognized; countries where English is merely an official language and international schools are excluded.
[영어 원어민은 영어권 국가(예: 미국, 영국, 캐나다, 호주, 뉴질랜드, 아일랜드)에 소재한 고등학교에서 3년 이상 재학 또는 졸업한 사실을 증빙할 수 있는 서류(예: 졸업증명서)를 제출하고, 영어 교과 담당 교원의 승인을 받을 경우 영어 교과 이수가 면제됨.
※ 영어가 제1언어인 국가로 한정하며, 공용어 국가 및 국제학교는 제외함]

College of
Engineering

Department of Mechanical Engineering

[기계공학과]

■ Department Introduction [학과소개]

Mechanical Engineering deals with numerous systems and has a variety of important applications such as automobiles, aircraft, ships, home appliances, electronic devices, power plants and so on. The mechanical systems and the fundamental science and technology of mechanical and aerospace engineering have made dramatic advances and high impacts on the global economies and the standard of living. In the track of mechanical and aerospace engineering, students are educated and trained to learn the underlying principles of mechanical and aerospace engineering and to apply the knowledge to real-world examples and case studies hands-on. Disciplines include thermodynamics, fluid mechanics, solid mechanics, dynamics, machine design, advanced materials processing, laser-assisted manufacturing, micro/nano machining, unmanned vehicle control, MEMS, biomedical products, controls and mechatronics, acoustics, tribology and so on.

1. Graduation Requirement [졸업 이수요건]

Category 구분		Credits 이수학점	Remarks 비고	Subtotal 소계
Basic 기초	Required 필수	17	Calculus I(3), General Physics I(3), General Chemistry I(3), General Biology(3), Introduction to AI Programming I(3), General Chemistry Lab I(1), General Physics Lab I(1) (Total 17 credits)	At least 30 Credits
	Elective 선택[학과 지정]	13	Complete basic elective courses at least 13 credits including Applied Linear Algebra(3) and Differential Equations(3)	
Major 전공	Required 필수	24	Refer to Required course list below	At least 48 Credits
	Elective 선택	24	Refer to Elective course list below	
	Internship 인턴십	3	Internship (Choose one among Research, Industrial, Venture Creation, Co-op)	3 Credits
Free Elective 자유선택		19	All courses acceptable	At least 19 Credits

* For Liberal Arts and Leadership requirements, refer to school Common requirements

Department of Civil, Urban, Earth, and Environmental Engineering

[지구환경도시건설공학과]

■ Department Introduction [학과소개]

Climate change and environmental pollution caused by global urbanization and industrialization have imposed an increasing threat to the entire future of mankind. With no surprise, studies on these issues are drastically gaining in importance. Civil, Urban, Earth, and Environmental Engineering is an interdisciplinary field of study that is dedicated to education and research on the resilient protection of natural and built environments against disasters, as well as the sustainable development of urban society.

In this field, the students will learn fundamental knowledge associated with urban and environmental issues, and will explore more advanced courses regarding Environmental Sciences and Engineering (climate change, water and air treatment, environmental analysis and modeling), Urban Infrastructure Engineering (urban planning, construction materials, structural mechanics and design, health monitoring), and Disaster Management Engineering (fine dust, earthquake, typhoon). The Department of Urban and Environmental Engineering at UNIST is committed to developing innovative technologies in the related fields and cultivating future leaders who will make a huge impact on our profession and society.

1. Graduation Requirement [졸업 이수요건]

Category 구분		Credits 이수학점	Remarks 비고	Subtotal 소계
Basic 기초	Required 필수	17	Calculus I(3), General Physics I(3), General Chemistry I(3), General Biology(3), Introduction to AI Programming I(3), General Chemistry Lab I(1), General Physics Lab I(1) (Total 17 credits)	At least 30 Credits
	Elective 선택[학과 지정]	13	1) "What you may (not) want to know about cities and environment" is included in the fundamental elective, but not included in the requirement for graduation 2) All the other fundamental elective courses will be accepted in CUEE	
Major 전공	Required 필수	15	Refer to Required course list below	At least 54 Credits
	Elective 선택	39	Refer to Elective course list below	
	Internship 인턴십	3	Internship (Choose one among Research, Industrial, Venture Creation, Co-op)	3 Credits
Free Elective 자유선택		13	All courses acceptable	At least 13 Credits

* For Liberal Arts and Leadership requirements, refer to school Common requirements

2. Basic Requirements [기초 이수요건]

Department of Semiconductor Engineering

[반도체공학과]

■ Department Introduction [학과소개]

Semiconductors are a comprehensive and multidisciplinary academic and technical field encompassing materials, processes, devices, equipment, circuits, and system design. Semiconductors are an important industry that forms the foundation of all industries, and a field in which technological development is progressing very rapidly. Therefore, it is important to foster excellent talents and secure cutting-edge technological competitiveness. The Department of Semiconductor Engineering operates UNIST's first contract department to foster global semiconductor core talents through collaboration between UNIST, which has the best faculty and research infrastructure, and Samsung Electronics, which has world-class capabilities. The curriculum is operated as a bachelor's and master's degree program that links undergraduate and graduate courses (3.5 years for bachelor's degree + 1.5 years for master's degree). Successful completion of all courses guarantees employment in a process position at Samsung Electronics.

Department of Materials Science and Engineering [신소재공학과]

■ Department Introduction [학과소개]

The Department of Materials Science & Engineering is an interdisciplinary field which emphasizes the study on the interrelationship among processing, structure, and properties in materials. One who is in this discipline will be able to identify the key issues and strategies for any given challenges in materials development, based on deep understanding of the interrelationship. To this end, the Department of Materials Science & Engineering offers a range of subjects from fundamentals such as Thermodynamics in Materials and Crystallography to up-to-dated advanced courses covering specific topics such as next generation semiconductors, energy conversion materials, and flexible materials.

1. Graduation Requirement [졸업 이수요건]

Category 구분		Credits 이수학점	Remarks 비고	Subtotal 소계
Basic 기초	Required 필수	17	Calculus I(3), General Physics I(3), General Chemistry I(3), General Biology(3), Introduction to AI Programming I(3), General Chemistry Lab I(1), General Physics Lab I(1) (Total 17 credits)	At least 32 Credits
	Elective 선택 [학과 지정]	15	Recommended: General Physics II(3), General Chemistry II(3), Differential Equations(3), Applied Linear Algebra(3), Introduction to AI Programming II(3)	
Major 전공	Required 필수	21	Refer to Required course list below	At least 51 Credits
	Elective 선택	30	Refer to Elective course list below	
	Internship 인턴십	3	Department graduation requirement: Complete at least 3 credits of research internship or Coop internship and submit internship report	3 Credits
Free Elective 자유선택		14	All courses acceptable	At least 14 Credits

* For Liberal Arts and Leadership requirements, refer to school Common requirements

2. Basic Requirements [기초 이수요건]

Interdisciplinary Major in Semiconductor Specialization [반도체특성화융합전공]

■ Introduction[전공 소개]

The Interdisciplinary Major in Semiconductor Specialization is designed to provide the multidisciplinary knowledge about four important fields including semiconductor materials, devices, processes, and packaging. The major also emphasizes hands-on experiments and the researches on semiconductor processing and devices by the students, and industry-academic cooperation which the students can actively join. To this end, the interdisciplinary major offers a range subjects from Department of Materials Science and Engineering, Mechanical Engineering, Energy and Chemical Engineering, Physics, Chemistry and Electrical Engineering.

		MSE472 Atomic layer materials processing(원자층제어박막공정 (ALD))
		MSE473 Ultra-fine patterning process(초미세패터닝공정)
		MSE474 Low-dimensional semiconductor materials(저차원 반도체 소 재)
		MSE475 Emerging AI Semiconductor Materials and Devices (차세대 인공지능 반도체 소자)
		MSE476 Process integration lab(집적회로공정실험)
		MSE477 Industry-University Joint research (산학연구 프로젝트)
		MSE478 Special Topics on Lithography(리소그래피 특론)
		MSE479 Materials for Organic Electronics(유기전자재료)

School of Energy and Chemical Engineering

[에너지화학공학과]

■ School Introduction [학과소개]

The School of Energy and Chemical Engineering (ECHE) at UNIST aims to promote the growth of highly capable and motivated engineers who can address challenges not only in existing chemical processes but in globally emerging topics of energy and environment. By taking core courses of chemical engineering, such as transport phenomena and reactor design, students will gain a deep understanding of the chemical engineering principles, and learn how the principle applies to solving problems in the following areas: design and control of chemical processes, next-generation catalysis, novel functional materials and devices, biosystems and metabolic engineering, artificial intelligence, modeling and simulation of chemical processes, and energy harvesting and storage. Students will have opportunities to evaluate and clarify their career direction by taking laboratory courses and a research internship, both of which are carefully designed and advised by the faculty members in ECHE. Having close ties with leading research institutions and industry partners, both domestic and overseas, ECHE at UNIST also provides a well established academia-industry convergence research program in various fields.

1. Graduation Requirement [졸업 이수요건]

Category 구분		Credits 이수학점	Remarks 비고	Subtotal 소계
Basic 기초	Required 필수	17	Calculus I(3), General Physics I(3), General Chemistry I(3), General Biology(3), Introduction to AI Programming I(3), General Chemistry Lab I(1), General Physics Lab I(1) (Total 17 credits)	At least 32 Credits
	Elective 선택[학과 지정]	15	5 mandatory courses designated by school -Calculus II, General Physics II, General Chemistry II, Differential Equations, Introduction to AI Programming II	
Major 전공	Required 필수	33	Refer to the required courses * Additional requirements for graduation 1) Completion of 8 theoretical courses 2) Choosing 2 experimental courses out of 6 3) Undergraduate Thesis Research	At least 51 Credits
	Elective 선택	18	Refer to Elective course list below	
	Internship 인턴십	3	Internship (Choose one among Research, Industrial, Venture Creation, Co-op)	3 Credits
Free Elective 자유선택		14	All courses accepted	At least 14 Credits

* For Liberal Arts and Leadership requirements, refer to school Common requirements

Department of Nuclear Engineering

[원자력공학과]

■ Department Introduction [학과소개]

Nuclear Engineering is comprised of various science and engineering branches, such as nuclear reactor physics, radiation engineering, nuclear safety engineering, thermohydraulics, nuclear materials engineering, radiation material science, nuclear fuel cycle engineering, health physics, nuclear policy, nuclear material safeguards and non-proliferation, nuclear power plant decontamination and decommissioning, and nuclear fusion science and engineering, and also medical radiation science with artificial intelligence(AI). Department of Nuclear Engineering currently has 10 faculty members and provides a variety of courses covering almost all the branches of nuclear science and engineering above mentioned. The thoroughness of our program will promote students to be fully qualified nuclear scientists and engineers who can compete globally.

Graduate School of Carbon Neutrality

[탄소중립대학원]

■ Department Introduction [학과소개]

UNIST Graduate School of Carbon Neutrality sets its sights on developing standard model of carbon neutral education in order to proactively respond to be in line with the rise of the global new paradigm, 2050 carbon neutrality and training scientifically and technologically talented human resources, who have high-quality of professionalism and understanding regarding carbon neutral technology and relevant policy. UNIST Graduate School of Carbon Neutrality will educate and research focusing on 4 topics: carbon dioxide capture·utilization·storage, hydrogen production·transportation·storage, renewable energy including solar cell, and environmental managing policy including ESG. Through newly innovative educational and research program for training convergent talents, students will grow as global experts and play a leading role in the carbon neutral research field at home and abroad. Especially, UNIST Graduate School of Carbon Neutrality which is placed in Ulsan, the city where carbon dioxide emitting industries such as petrochemicals, oil refining, and shipbuilding, etc. are concentrated, is the best venue for developing carbon neutral research and demonstration. Therefore, we will definitely take the lead on accelerating to carbon neutral society by producing outstanding individuals through not only scientific and technological world but also industrial world.

Biotechnology

Department of Design

[디자인학과]

■ Department Introduction [학과소개]

The goal of the Department of Design is to foster creative designers who can lead the innovative design of product and product-service systems. We will provide interdisciplinary courses on design knowledge, methods and techniques, including problem definition, user and market analysis, needs finding, creative idea generation, form and function development, design engineering, prototyping and business start-up. Students majoring in Design will play an essential role as integrative design thinkers and practitioners in future society, leading positive and innovative change in our society by employing user-centered design and research methods to drive the design and development of innovative design interventions.

1. Graduation Requirement [졸업 이수요건]

Department of Biomedical Engineering

[바이오메디컬공학과]

■ Department Introduction [학과소개]

Department of biomedical engineering (BME) aims to improve human health by applying advanced engineering principles and methods to medical and biological problems, such as disease diagnostics, health monitoring, treatment, and therapy. In order to meet the increased needs in healthcare, BME at UNIST pursues to train creative global leaders through top-class interdisciplinary research and education programs. Our competitive research programs is focused on selected topics including advanced biomedical devices, rehabilitation and regenerative engineering, genome engineering, brain & cognitive engineering, and digital healthcare.

Department of Industrial Engineering

[산업공학과]

■ Department Introduction [학과소개]

The department of Industrial Engineering (IE) pursues state-of-the-art research and education in order to nurture data scientists who can contribute to the development of problem-solving methodologies and advancement of their applications. Under the vision of “Data-Driven Convergence,” the department of Industrial Engineering (IE) focuses on research into quantitative data analysis techniques such as statistics, optimization, data mining, artificial intelligence, process mining, and financial engineering.

1. Graduation Requirement [졸업 이수요건]

Category 구분		Credits 이수학점	Remarks 비고	Subtotal 소계
Basic 기초	Required 필수	17	Calculus I(3), General Physics I(3), General Chemistry I(3), General Biology(3), Introduction to AI Programming I(3), General Chemistry Lab I(1), General Physics Lab I(1) (Total 17 credits)	At least 32 Credits
	Elective 선택[학과 지정]	15	Complete 15 credits including required courses Required: Applied Linear Algebra(3), Statistics(3), AIP2(3)	
Major 전공	Required 필수	24	Refer to Required course list below – Must include Project Lab (3 credits)	At least 48 Credits
	Elective 선택	24	Refer to Elective course list below	
	Internship 인턴십	3	Internship (Choose one among Research, Industrial, Venture Creation, Co-op)	3 Credits
Free Elective 자유선택		17	All courses accepted	At least 17 Credits

* For Liberal Arts and Leadership requirements, refer to school Common requirements

Department of Biological Sciences

[생명과학과]

■ Department Introduction [학과소개]

Biological Sciences have taken the center stage of science, technology, and industry. Biomedical healthcare industry is the biggest industry; it is more than three times the information-communication industry and the automobile industry combined. All areas of basic science and engineering are focused on Biology. For example, bioinformatics, biomechanics, and biochemical engineering are “hot” areas. Infectious diseases such as the pandemic coronavirus are accelerating this trend even further. The 21 faculty members at the Department of Biological Sciences at UNIST study diseases like cancer, diabetes, and neurodegenerative disease as well as basic biology such as neuroscience, development, and microbes including viruses. They are internationally recognized for their high impact papers published and prestigious research funds obtained. UNIST Biological Sciences will open doors to a bright future.

1. Graduation Requirement [졸업 이수요건]

* Courses that are not required for Minor/Double Major can be counted as Elective course.

* As a measurement of changed courses(BIO305, BIO330), student's who've entered before 2025 can be taken "BIO305" and "BIO330" as their required credits to meet the total required credits.

* BIO301 Cell Biology will be classified as a Major Elective for students following the 2026 curriculum year and onward.

For students under the previous curriculum year (up to 2025) who have not completed the previous BIO301 Cell Biology, the new required course BIO293 General Cell Biology will be recognized as a Major Requirement upon completion.

BIO301 세포생물학 과목은 2026 교육과정 연도를 따르는 학생들부터 전공선택으로 인정되며, 이전 교육과정 연도(~2025)를 따르는 학생 중 기존 BIO301 세포생물학 미 이수자는 신규 필수과목인 BIO293 일반세포생물학 이수

Graduate School of Health Science and Technology

[의과학대학원]

■ Department Introduction [학과소개]

Medicine, traditionally based on the life sciences, is progressively integrating with artificial intelligence, data science, biomedical engineering, and others, moving towards the era of smart precision medicine. The Graduate School of Health Science and Technology is planning research in sync with these changes in collaboration with various departments within the College of Information and Biotechnology and, more broadly, within UNIST to create a healthier life for humanity. By utilizing networks with large domestic hospitals, medical schools, and international collaborations, we carry out educational programs and research projects that were impossible under the previous system to promote applications in health practice and industry by building an innovative environment. We envision a future where ideas from medicine, engineering, and science converge in this integrated environment via dynamic interactions between doctors who understand engineering and engineers who understand medicine, leading to new research sprouting and eventually being practical and industrialized.

* Students must select and complete 1 course from Elective1(HST202, HST203, HST204, HST205, HST206, HST207) and 1 course from Elective2.

Department of Electrical Engineering

[전기전자공학과]

■ Department Introduction [학과소개]

Electrical engineering (EE) is a field of engineering that deals with everything from solid-state devices and designing integrated circuits to developing information and control systems. It focuses on research and development of IT convergence systems which are capable of enriching the future life of human being to be pleasant, secured, convenient and socially connected. A broad range of IT technologies in the EE areas are to be proactively merged together to create new benefits with the advent of ubiquitous information society driven by digital convergence.

1. Graduation Requirement [졸업 이수요건]

Category 구분		Credits 이수학점	Remarks 비고	Subtotal 소계
Basic 기초	Required 필수	17	Calculus I(3), General Physics I(3), General Chemistry I(3), General Biology(3), Introduction to AI Programming I(3), General Chemistry Lab I(1), General Physics Lab I(1) (Total 17 credits)	At least 33 Credits
	Elective 선택[학과 지정]	16	Required: Calculus II(3), Differential Equations(3), Applied Linear Algebra(3), Introduction to Modern Electrical Engineering(1) Elective: 6 credits of elective or recommended courses from the list (Total 16 credits)	
Major 전공	Required 필수	21	Refer to the required course list provided below.	At least 48 Credits
	Elective 선택	27	Refer to the elective course list provided below.	
	Internship 인턴십	3	Complete one of the following internship options: Research Internship, Industrial Internship, Venture Creation Internship or Coop Program	3 Credits
Free Elective 자유선택		16	All courses are accepted	At least 16 Credits

* For Liberal Arts and Leadership requirements, refer to school Common requirements

Department of Electrical Engineering

Department of Computer Science and Engineering [컴퓨터공학과]

■ Department Introduction [학과소개]

While most of people are familiar with computers, not many people have a good understanding of what computer science and engineering (CSE) is really about. Implementation of computer programs that improve the quality of human life is an important aspect of computer science and engineering, however learning how to write computer programs is not the core discipline of computer science but just a necessary skill to implement and prove creative and innovative computational logics and ideas in many broad sub-areas of computer science such as algorithms, theoretical computer science, programming languages, operating systems, databases, networks, computer security, computer graphics, artificial intelligence, and many more. In CSE track, students learn foundational principles of the core sub-areas of computer science. Having this curriculum, we cultivate the finest computer scientists and engineers that have the ability of conducting highly creative and innovative research and creating high-quality computing solutions. CSE graduates typically find jobs in IT-related companies or national research institutes or continue to study in graduate schools.

■ Department Introduction [학과소개]

Physics forms a fundamental knowledge system and a framework of 'thinking' for almost every other contemporary science and technology. We incubate the next generation human resources to inherit and lead the diverse researches in modern physics by providing a set of related curriculums. In the physics track of UNIST, we offer not only basic physics courses such as classical mechanics, electromagnetism, quantum physics, statistical physics, mathematical physics and basic laboratory experiments, but also advanced courses for the future research such as solid state physics, optics, computational physics, plasma and beam physics, biological physics, particle physics, cosmology, advanced experiments, etc.

* 복수전공 졸업논문 제외 8과목 중 최소 6과목(18학점)/부전공 졸업논문 제외 8과목 중 최소 4과목(12학점) 이수
Students pursuing a double major should take at least six courses (18 credits) out of eight, excluding Graduation Thesis.
Students pursuing a minor should take at least four courses (12 credits) out of eight, excluding Graduation Thesis.

* 트랙제 학생들의 경우 창의시스템구현과 졸업논문 중 하나를 선택하여 이수

Students following the track-based curriculum may choose either an Interdisciplinary Project or Graduation Thesis.

*[For Major] When students who took PHY213 Modern Physics or PHY213 Fundamentals of Quantum Information retake the course, PHY213 Modern Physics is a substitute from 2025 year. (Application of required course requirement follows student admission year's curriculum.)

*[For Micro Major] When micro major students who took PHY213 Fundamentals of Quantum Information as a required course retake the course, they should take PHY462 Fundamentals of Quantum Information from 2025 year.

*For students admitted in the 2025 academic year, if 'PHY307 Physics Laboratory II: Physics Lab Tour' has not been completed, 'PHY209 Introduction to Research in Physics' will be recognized as a substitute for the required course 'PHY307 Physics Laboratory II: Physics Lab Tour'.

Department of Mathematical Sciences

[수리과학과]

■ Department Introduction [학과소개]

Department of Mathematical Science explores the connections between mathematics and its applications at both the research and educational levels. In addition to focusing on traditional study in pure mathematics, our research at UNIST is devoted to encompass some of the most diverse and interdisciplinary research in the physical, business, economics, engineering, and biological sciences. The department provides a dynamic and engaging research environment in scientific computing, mathematical biology, finance, dynamical systems, image processing, number theory and analysis in PDEs. The undergraduate and graduate curriculum is planned with the following varied objectives: (1) to offer students an introduction to the fundamental study of quantity, structure, space, and change; (2) to prepare students for graduate study in pure or applied mathematics; (3) to serve the needs of students in fields that rely substantially on mathematics, such as the physics, biology, engineering, business and economics.

1. Graduation Requirement [졸업 이수요건]

Category 구분		Credits 이수학점	Remarks 비고	Subtotal 소계
Basic 기초	Required 필수	17	Calculus I(3), General Physics I(3), General Chemistry I(3), General Biology(3), Introduction to AI Programming I(3), General Chemistry Lab I(1), General Physics Lab I(1) (Total 17 credits)	At least 30 Credits
	Elective 선택[학과 지정]	13	Complete 13 credits including required courses - Required(10): Calculus II(3), Differential Equations (3), Applied Linear Algebra (3), Understanding Major(1), - Elective(3): refer to elective course list in No.2	
Major 전공	Required 필수	30	Refer to Required course list below Graduation thesis required(No credits for thesis)	At least 54 Credits
	Elective 선택	24	Refer to Elective course list below	
	Internship 인턴십	3	Internship (Choose one among Research, Industrial, Venture Creation, Co-op)	3 Credits
Free Elective 자유선택		13	All Course Accepted	At least 13 Credits

* For Liberal Arts and Leadership requirements, refer to school Common requirements

* 학과제 변경자 및 2021년 입학생부터 2025년도 학과 지정 기초학점 요건 및 자유선택 학점 요건을 소급 적용함.

The basic requirement and free elective for Mathematical Science of 2025 year applies to students who change their curriculum to department-based curriculum(학과제) and who entered in 2021 or later retroactively.

2. Basic Requirements [기초 이수요건]

* It is highly recommended to register the subject related to academic connectivity.

※ If you have taken more than five required courses (15 credits) in the case of a Double major, the excess credits can be replaced with major elective credits. For minor, if you have taken more than four courses (12 credits) required for your major, the excess credits can be replaced with major elective credits.

※ If you have taken MTH322, it can substitute required course, MTH321.

※ 복수전공은 전공필수 과목을 5과목(15학점)을 초과하여 수강한 경우, 초과 학점은 전공선택 학점으로 대체 가능. 부전공은 전공필수 과목을 4과목(12학점)을 초과하여 수강한 경우, 초과 학점은 전공선택 학점으로 대체 가능

※ 전공 선택 과목(MTH322)을 수강한 경우, 전공 필수 과목(MTH321)으로 대체 가능

Department of Chemistry

[화학과]

■ Department Introduction [학과소개]

Chemistry is a central science that seeks the understanding of nature and interactions between atoms and molecules. In addition to this essential scientific question, modern development such as nanoscience offers new chances to explore the world of 'beyond atoms and molecules'. The department offers lectures and experimental courses in all fields of chemistry: physical, organic, analytical, biological, and materials/polymers chemistry. The department stresses a research experience as an essential educational tool. Research opportunities with our world-class researchers are provided to all undergraduate students in the state-of-the-art facilities and environment.

1. Graduation Requirement [졸업 이수요건]

Category 구분		Credits 이수학점	Remarks 비고	Subtotal 소계

School of Business Administration

[경영과학부]

■ School Introduction [학부소개]

The mission of the UNIST School of Business Administration (SBA) is to educate and develop leaders and enterprise builders, who create new wealth by integrating science & technology with business management. The academic curriculum of the School is specifically tailored to accomplish this mission by offering focus courses in critical-thinking, data analytics, and entrepreneurship as well as a variety of courses in conventional management. Through our rigorous and contemporary curriculum, students will build a strong theoretical foundation and gain the agility to pursue myriad options on the path to becoming influential leaders and business champions, who will create a better world.

The School of Business Administration boasts faculty members who have obtained Ph.D. degrees from prominent institutions. Their courses enable students to acquire expert business knowledge by emphasizing individual, experiential, and team-based learning. Specifically, by offering courses taught in English, students develop the confidence to effectively communicate their ideas in the international language of commerce. With the smallest faculty-student ratio in South Korea, research and education are more personalized, relevant, and forward-thinking, and collaborations between faculty and students are more productive.

Our students can enjoy various benefits, to wit: 1) receive world-class education; 2) participate in research with faculty members; 3) study abroad; 4) sign-up for practice-based or research-based internship programs; 5) receive scholarship for almost all students; and 6) live in dormitory complexes. The School of Business Administration provides a transformational experience, enabling students to realize their full potential.

In 2018, the UNIST SBA received AACSB (Association to Advance Collegiate School of Business) International Accreditation, which means that our programs at the bachelor's, master's, and doctoral levels have proven to be among the top 5 percent in business education worldwide. We hope that all young people who dream of becoming a global leader in the field of research or practice in cutting-edge new industries can join the UNIST SBA to leap together.

FIA441	Financial Statement Analysis 재무제표분석	○	○	○	3-3-0	[PRE] MGT205	2
FIA443	Cost Accounting 원가관리전략	○	○	○	3-3-0	[PRE] MGT206	-
FIA450	Data Science for finance 금융빅데이터 분석	○	○	○	3-3-0		2
FIA451	Financial Market Analysis using AI 인공지능을 활용한 금융시장 분석	○	○	○	3-3-0		1
IE201	Operations Reserach I 계량경영학 I	○	○	○	3-3-0	Refer to each department section	
MEN456	Artificial Intelligence Based Digital Manufacturing AI 기반 디지털 제조 공학	○			3-3-0		
MEN472	Creating Autonomous Car 자율주행 자동차 만들기	○			3-3-0		
PHY451	Network Science and Machine Intelligence 네트워크과학과 기계지능	○			3-3-0		
UNI207	Creative Computing for Media Art 창의적 컴퓨팅과 미디어아트	○			1-1-0		
BME437	AI-based Affective Engineering AI 기반 감성공학	○			3-3-0		
BME447	AI-based Neural Data Science AI 기반 뇌과학 데이터 사이언스	○			3-3-0		

*[PRE]: Prerequisite(선이수), [IDEN]: Identical(동일지정교과)

*AI연계 교과목·POL교과목·One-day Lecture 교과목으로 이수한 학점은 주전공에 한하여 최대 9학점까지 전공선택 학점으로 인정함

5. Curriculum Map [교육과정 이수 체계도]

Sophomore 1 st Semester	Sophomore 2 nd Semester	Junior 1 st Semester	Junior 2 nd Semester	Senior 1 st Semester	Senior 2 nd Semester
경영통계분석 (Data Analysis & Decision Making)	경영정보론 (Management Information Systems)	비즈니스데이터 사이언스 (Business Data Science)	비즈니스AI (Business AI)		금융공학 비즈니스랩 (Business Lab for Financial Engineering)
조직행동론 (Organizational Behavior)		혁신과 변화의 관리 (Managing Innovation and Change)	인사관리 (Human Resource Management)	경영전략 (Strategic Management)	경영과학특론 (Special Topics in MGT)
비즈니스커뮤니케이션&리더십 (Business Communication & Leadership)				기술데이터를 활용한 혁신전략 분석* (Analyzing Innovation Strategy Using Technology Data)	
마케팅관리 (Marketing Management)		마케팅조사론 (Marketing Research)	국제마케팅 (International Marketing)		디지털 마케팅 (Digital marketing)
	생산운영관리 (Operations Management)	공급망관리 (Supply Chain Management)			
	계량경영학 (Operations Research)				
미시경제학 (Microeconomics)		거시경제학 (Macroeconomics)	국제경제학 (International Economics)		
			계량경제학 (Econometrics)		
재무회계 (Financial Accounting)	관리회계(Managerial Accounting)	중급회계(Intermediate Accounting 1)	재무제표분석 (Financial Statement Analysis)		
	재무관리 (Financial Management)	선물과 옵션 (Futures and Option)	금융공학개론 (Introduction to Financial Engineering)	금융시계열 분석 (Financial Time-series Analysis)	증권시장론 (Financial Markets)
	투자론 (Investments)	계량재무론 (Quantitative Finance)		채권투자 (Fixed Income Securities)	리스크 관리 (Risk Management)
					인공지능을 활용한 금융시장 분석* (Financial Market Analysis using AI)

2026 Undergraduate Course Catalog

Date of Issuance 21st Jan, 2026
